

Name: Rolf Nilsson

Age: 62 years old.

Family: married and two stepchildren.

Work: He is an assistant principal at our school.

Interview with the assistant principal
We're sitting in the library during the interview with Rolf.

About his work

Before starting working in this school he used to work as a principal and teacher in other schools. But he figured that this job was better for him so in 2011 he started working here and he has enjoyed the three years he has worked here. But of course there are ups and downs

when you work in a school and the best about this job is that every day is a new day, what he means is that it always happens new things and there are different challenges to solve.

The most difficult thing is to solve problems with students for example when something happens between some students and he has to listen to all of them and make the best of the situation and come up with a solution.

His job in this school is to assist the teachers for example with their schedule and all of the problems that may occur. He works with management, updates Schoolsoft, which is a platform where you can watch schedules, and other things that belongs to the school.

Other facts

He has one older brother who is three years older than him. Rolf's parents were married but they have past away. And he lives in Stockholm in a house with his wife and her children.

He played different sports when he was younger but he preferred playing basketball. He played basketball for five years until he got injured and couldn't play anymore. Rolf coached different teams and also the Swedish national team. He was a coach for three seasons.

Dragons

4-9th graders went to Cosmonova in Nature History museum.

Cosmonova is like a cinema but all the movies are 3D. The shape of the screen is making enormous on the wall all around the seats. We watched a movie called Dragons. The movie is about two dragons and a girl who had nightmares about one of the dragons.

The Detectives

The Junior Movie festival goes on for 12 days and some cinemas in Stockholm show 180 films from over 50 different countries.

In the beginning of April the 5th graders went to see a movie called The Detectives. They saw the movie in a cinema called Skandia and it is located in Hötorget which is located in Stockholm.

Interview with Nikita and Arthur.

Did you enjoy the movie?

- The movie wasn't so good, some parts were unrealistic.

Would you like to see the movie again?

-No, because it wasn't so good.

Sputnik

I interviewed the fourth grade about the movie Sputnik.

The 4th and 5th grade went to watch a movie called Sputnik on Drottninggatan in Stockholm. The main characters are Rika and her uncle. The movie was recorded during the time when the Berlin wall existed. Rika and her uncle lived in one of the two sides. The people were divided in two parts and almost nobody could get into the other side. You'd get killed if you tried to get over to the other side. Rika, her friends and her uncle made a teleporter to be able to get to the other side. The plan worked and everybody who lived with them got to the other side except Rika and her friends. Rika's uncle was already on the other side of the Berlin wall. Something went wrong with the teleporter so everybody who got away with the teleporter got back even Rika's uncle. It started a big riot and the Berlin wall got destroyed, everybody got free and lived happily ever after.

English theme week

The English theme week is a week when you are supposed to only speak English and learn about different things such as facts about English speaking countries and English history.

This time we talked about William Shakespeare since he celebrated 450 years and the play Romeo & Juliet. All the classes in the school either did short movies or short plays about Romeo & Juliet. In the end of the week the 7th to the 9th grade watched their movies together.

In some movies they used paper dolls and in the others they did a short play and recorded instead of doing it live.

Who is William Shakespeare?

William Shakespeare was an actor, a play writer and a poet. He was baptized 26th of April in 1564. His birth date is unknown but people think that he was born on the 23rd of April, because back then you often baptized the new born baby three days after the birth. One of his famous plays is Romeo & Juliet which later on became a movie. Shakespeare did a lot of things in his life, for example he built his own outdoor theater called the Globe. The Globe burnt down once but then it was rebuilt. William died in the same city he was born in, on the 23rd of April 1616 .

The big Challenge

The big challenge is a big English competition.

Over 650 000 students have participated in the big challenge. It's played in May, and more than 5 500 schools in Europe took part in this competition. The big challenge is the first international English contest. The big challenge has also a site on internet where people can play and practice, it's good for students because they learn new words, grammar and facts. In our school the 7th to 9th graders took part in this competition. There are five levels that you can practice on. The levels practicing different things. In the competition there are about 54 questions that you are supposed to answer. The test has got multiple answers that you are supposed to choose from: a b c and d.

Sett Fair

Sett stands for Scandinavian Educational Transformation. It helps to get more knowledge regarding how the modern learning can be made in schools toward higher achievement. During SETT teachers, principals and school managers from all over Scandinavia will meet and exchange ideas.

Our English teacher was invited to SETT by E-Twinning to inform about the possibilities to use it in school. She talked to audience and answered questions about E-Twinning.

Our principal assistant and school manager were there.

E-Twinning is a site where we communicate with pupils from other countries. This year we are exchanging the school newspaper with a French school.

Photo competition

We had a photo competition in our school. The theme was happiness so you needed to take a picture that would fit the theme.

The winner whose name is Vincent didn't think he would win. He just took a random photo when he was with his uncle. They were in another city in Sweden- Gothenburg and he was skating in a park. It was sunny and they were happy, because they enjoy skating. When he came back to school, he gave the photo that he took to a teacher whose name is Wiveca who collected all the photos, after she checked all the photos the winner was chosen. The winner got a cinema ticket and his photo was put on a wall in school.

Sports day

The 13th of May the whole school had a sports day.

Sports day is a day when the whole school goes out to a sports field and do different sports. The different sports we all got to chose from are high jumping, running 60 meters, shut put, scavenger hunting and many other. We have sports day twice a year.

I've interviewed some pupils from the 4th and 5th graders and also the children in pre school. These are their thoughts about the sports day.

Nikita and Arthur from the 5th and Hanna and Ahmer from 4th grade:

Which of the sports did you guys do ?

- We high jumped, ran 60 meters, bag jumping, scavenger hunting, shut put and Christmas day.

What's Christmas day ?

- It's when you put a long stick on your forehead and spin around it ten times. Then you run to a rock and run around it too

Was it fun? What was the funniest thing you guys did that day ?

- It was really fun and the funniest thing the whole day was that we got to play football in the end.

Would you like to have it more than twice a year?

-Yes!

Pre school pupils prevue about the day.

What did you do ?

-Well, we went to the park, ran , played football and went on a slide.

Was it fun?

-Yes, we would like to have this every day!

So everybody almost did the same things, 8th grade also did different tasks like for example: tell your teacher ten verbs in English.

Summer holiday

On the last day in school before summer almost every class perform in front of the rest of the school and the pupils families.

Every class gets to choose how they would like to perform. They can either sing or dance or if they don't want to do anything at all.

Most of the pupils in the lower grades are going to sing. Only a few pupils in 8th grade are going to sing together with some younger pupils and they are going to do it in Spanish.

Families can visit the school and watch the performances if they want to.

When all the grades have performed the principal has a speech about the year and wishes the 9th graders good luck in the future, when they start in the gymnasium.

The teacher often perform as well, every year so far they have made a special and secret number. Last year they danced and sang to Gangnam Style. Then all pupils gather in their classrooms and say good bye to each other -or at least their teachers- and the 6th-9th grades get their grades.

The school gives scholarships to some pupils. They can get it for example for their interest in school, the pupil who has improved the most in English and Swedish and the pupil with highest grades in the 9th grade. 8th grade is going to make a three dish dinner for the 9th grade and their teachers as a pram lunch.
