

EUROPEAN DECLARATION OF PLANET'S RIGHTS BY EUROPEAN KIDS

AMBITION

27 classes

27 european countries

1 declaration of planet's rights brought to European Parliament in nov 2019.

It's the first time in history that 27 classes of 11-15 yo, representing 27 countries of European Union will work together to write down the 1st **European Declaration of Planet Right's.**

PROJECT & PLANNING

- 1** **April/May 2019** : Each teacher identified by country chooses **2 specific ecology topics** on which the class will work to write an article for the Declaration. (Topics could be : Ocean, Animal, Energy, Industry, Plastic, Light, Transports, Forest, Oil, Ozone, Pollution... not exhaustive list). **May, 9th** : **Kick off meeting in France where topics will be revealed according by country.**
- 2** **Beg June 2019** : Topics will be shared with French Coordinator to start building a declaration-draft covering the main issues
- 3** **Aug-Mid October 2019** : Teacher and class start working independantly with their students in their classes on article(s)/recommendations linked to their topic. leaning on researches, best practices, press articles etc... It becomes a class-project shared by all on a Google Doc
- 4** **Mid october** - All contributions will be shared and submitted to a vote by class to define the very last 27 or 30 proposals/articles to be integrated in the final Declaration.

TOPICS

KICK- OFF IN FRANCE

When : May, 9th (european day)

What : France Televisions will launch internally and externally the project accordingly with European Union. It will be the opportunity to show a global video introducing all countries/professors participating. Planning will be detailed.

Then, french class attend workshop at France Televisions HQ

How : 3 groups of 5 to 6 students will work on 3 aspects of the articles they will propose : Legal aspects, political aspects and media aspects

A FRENCH-CLASS INITIATIVE

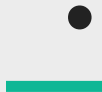

Since May 2018, France Televisions and I, have been making a web-serie. This film shows how fifteen " 12-year-old " decide to save the world because they have been taught by their teacher what is biodiversity and how we should protect it. Anaïs (the teacher) had them participate to "Kids french parliament" so that they propose a law to protect biodiversity . It was one of the main point for their citizen commitment.

Now, they want to move forward strongly. The "European Declaration of Planet Rights" is their goal and they represent France in this project.
